SAP TechEd

SAP AI Agent Hub
AI governance workshop: From discovery to decommissioning

SAP TechEd 2026

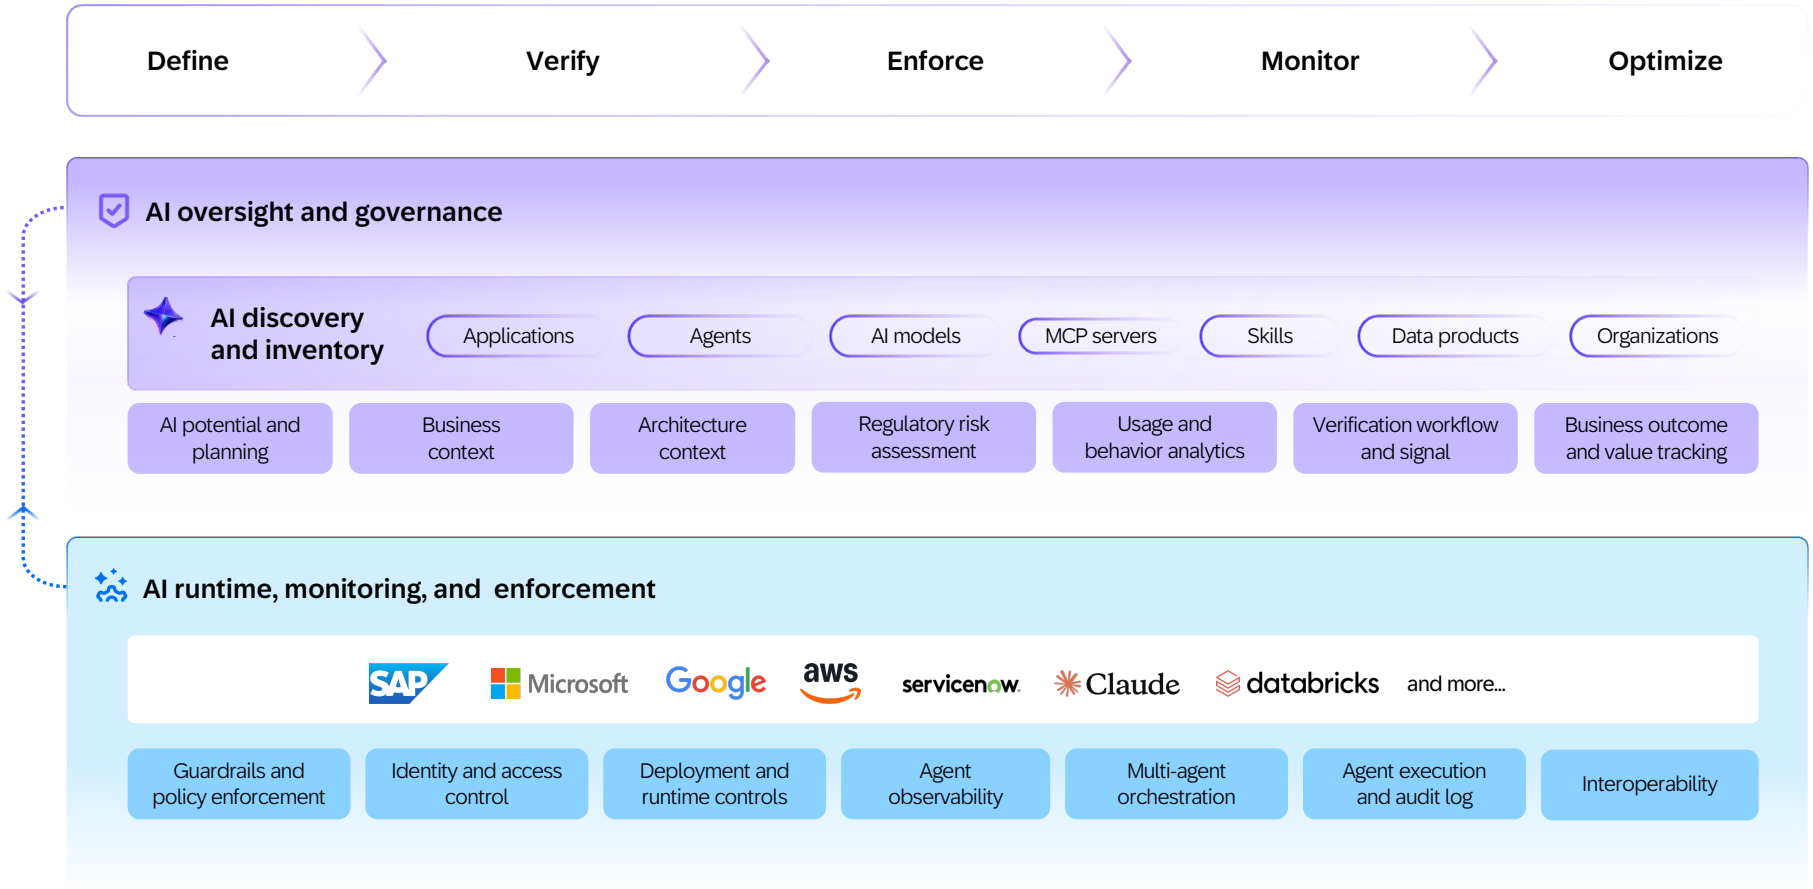

SAP TechEd

A framework that covers both design and runtime

Shadow AI is already in your organisation

BEFORE

Business teams deploy AI agents across the landscape, often without central visibility.

THE GAP

No shared inventory means ownership, purpose and lifecycle status remain unclear.

EXPOSURE

Without records, risk assessment and audit evidence are difficult to establish.

THE MANDATE

The enterprise architecture team must create a governed path within 90 days.

Your role today: Meet GlobalFlex AG

countries, with 8,000 employees
SAP S/4HANA as the backbone.

Landscape
SAP-native services, Microsoft 365 and a growing AI agent footprint.

Your role
You are part of the newly established AI Governance Center of Excellence.

Your task
Investigate a newly discovered agent, complete its governance record and decide its lifecycle outcome.

What you will learn

Document policy
Create an Architecture Decision Record for the governance policy.

Triage discovery
Review newly discovered agents and move the right item into inventory.

Build the profile
Add ownership, risk classification and the relevant ADR linkage.

Collect evidence
Send a survey to the business owner to fill information gaps.

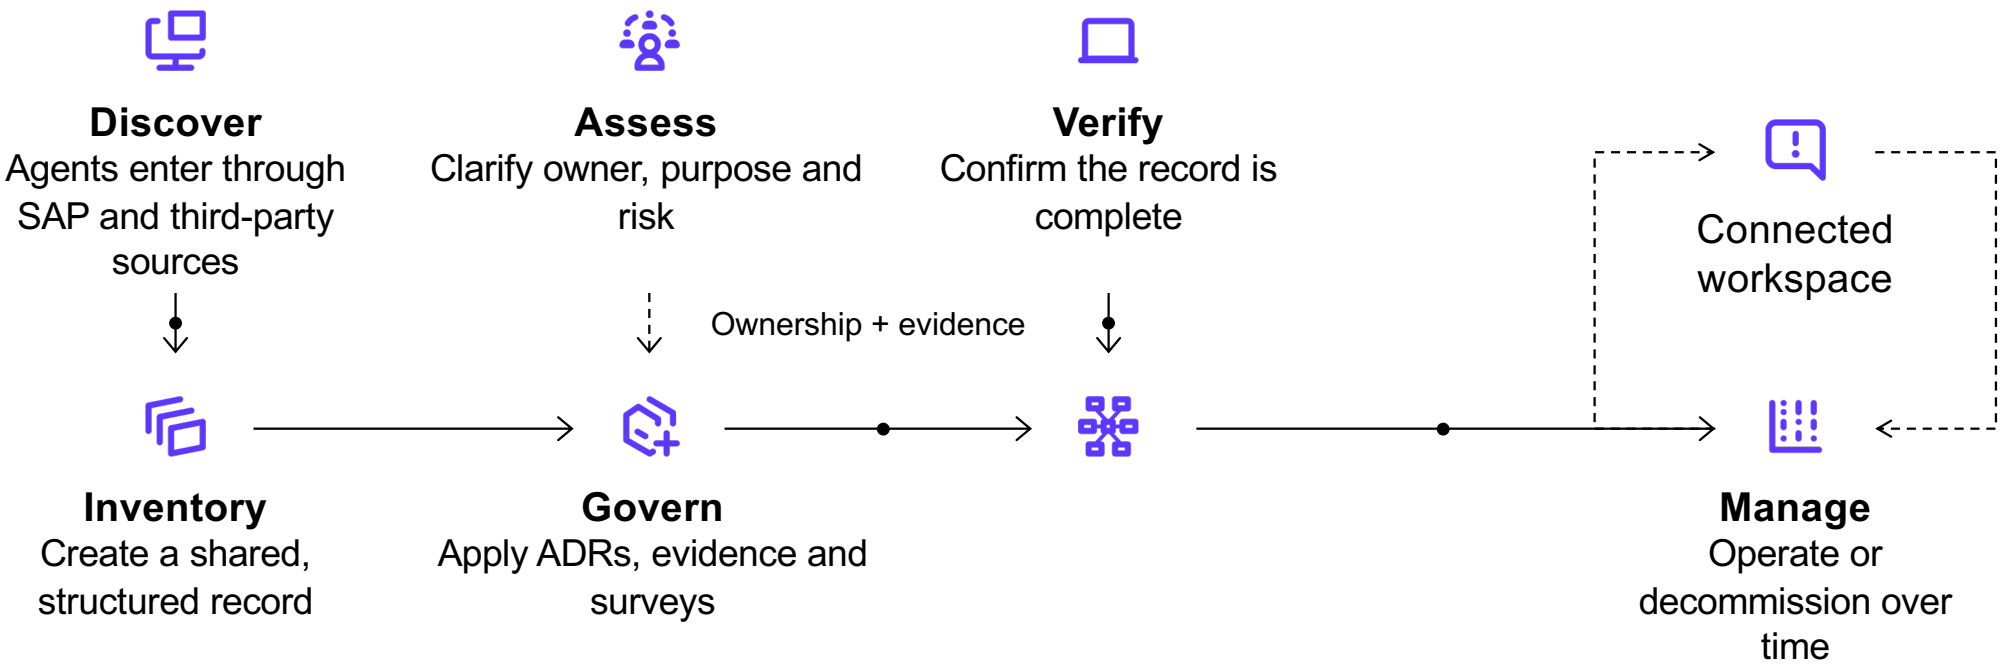

Verify readiness
Verify the agent when the complete governance record is in place.

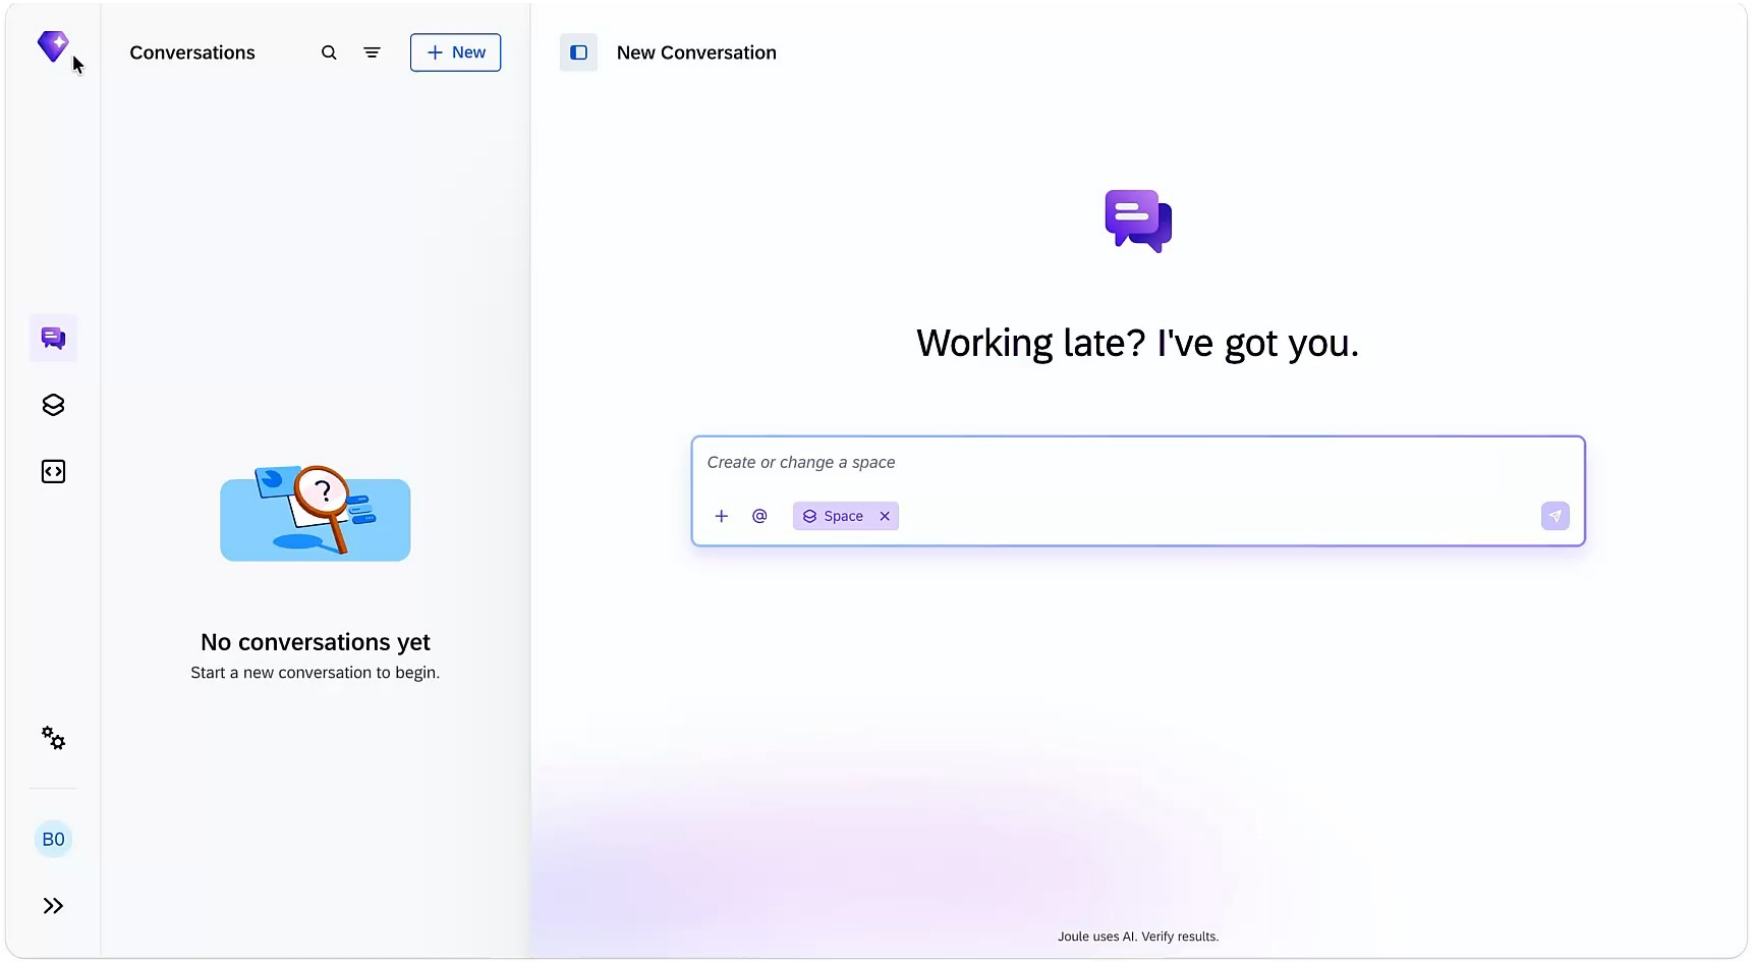

Close the lifecycle
Decommission a legacy agent and complete the lifecycle.

SAP LeanIX and AI Agent Hub in one minute

SAP LeanIX provides the enterprise architecture inventory. AI Agent Hub adds the agent-governance workflow.

Build and deploy custom agents in Joule Studio

Thank you.
